### **INTRODUCTION**

Language is a sound symbol that appears as a cultural product to be used as a means of communicating and interacting with other humans and the use of language is also adapted to the circumstances and culture. Language itself consists of a collection of words where each word has an abstract meaning and relationship with a concept or object represented by these words. The use of language is generally based on a set of rules so that the words spoken or written follow certain rules. According to Wibowo (2001:3), the notion of language is a system of sound symbols that are meaningful and articulate (generated by speech instruments) that are arbitrary and conventional, which are used as a means of communication by a group of humans to give

birth to feelings and thoughts. The language used in everyday life is sometimes wrong or what we know as profanity language. Profanity in a language is defined as obscene words, or dirty words. Profanity is traditionally said to be part of an expression that shows hostility. Similar to said that profanity has been regarded as a form of verbal aggression. The term profanity itself is closely related to the use of swear words, indecent words, and swear words used to describe the use of words that are offensive (offensive words). The use of profanity itself has been broadened to include most of the swear words that are offensive in nature or are considered unacceptable by the general public. However, profanity language does not always mean rude and dirty expressions of pleasure and admiration for an object or situation. The use of profanity language that is admiring, expresses conditions and expressions of admiration of a speaker. It's different with some speakers when using profanity words when they are upset, profane words that are spoken either directly or indirectly are words that mean rebuking and cursing someone. In this situation sometimes the use of profane words in the form of vulgar language using animals as a sign of anger such as, *damn, fuck, bitch, and bastard*.

In human life as a cultured creature, it is necessary to pay attention to how someone expresses words in language which is good, especially regarding the use of words that are culturally meaningful to be expressed in language. The language expressions expressed in the form of words must remain in the corridor of social and religious norms that are acceptable to the general public. There are certain words that must be avoided, both to be spoken and expressed because it is seen as profane and forbidden to be disseminated. Every society, everywhere with a different language, must have profaned in their daily communication activities. Etymologically, it means vile or dirty words spoken out of anger, irritation, or disappointment. Profanity Language is also called slur, cursing, or regret. So profanity is words that are said by someone when they feel angry, irritated, annoyed or emotional. In a different context, an ordinary person profane in condos or a friendly atmosphere or just a joke.

People often hear profanity language such as *shit, fuck, damn it, or nuts* when they hear in western songs. Profanity refers to obscene language including taboo and swear words, which in regular social settings are considered inappropriate and in some situations unacceptable. It often includes sexual references, blasphemy, objects eliciting disgust, ethnic-racial-gender slurs, vulgar terms, or offensive slang (Mabry, 1974). The reasons for using profanity depend on the person

and the situation, yet profanity is commonly related to the expression of emotions such as anger, frustration, or surprise (Jay & Janschewitz, 2008). There are many differences between the black people's profane words and white people, like how people use them, from the diction, the movement, the meaning, etc. It is different not only from the shape but also from the diction. For instance, the white people will say "*motherfucker*", but the black people will say "*muthafucka*". Those swear words are the same in meaning, yet different in diction. Besides, the black people also commonly use swear words such as "*damn*" and "*hell*", while the white ones commonly equating people with animals, such as " *fucking bitch*" and " *fucking pussies*".

One of the individual singers is Megan Thee Stallion. She is an American rapper, singer, and songwriter. She was Born in Bexar County, Texas and raised in South Park, Houston. Megan Thee Stallion began writing and rapping as a teenager. She first gained attention when her freestyling videos became popular on social media platforms like Instagram. Besides, Megan is one of rappers that mostly used swear words in her song lyrics because by using that word she felt satisfied with the problem that passed in her life without considering whether she can solve it or not, and every album that she released also became controversial, especially in his country. Because of that reason, the researcher is interested in analyzing Megan's song, especially her lyrics. Furthermore, every musician has many different ways to express something and one of these ways is singing. By song, the singers can express their ideas, feelings, and make them more attractive to the listener (Frederik, 1990: 144). The musicians mostly use beautiful language in making their song lyrics, including in used swear words.

The writer is interested in choosing Megan songs' lyrics because Megan songs have many profanity languages that can be analyzed. The examples of profanity language used are taken from the lyric of a song by Megan; "There's so many other *mother fuckers* that just are. Megan used the "*Bitch*" as a call for his enemies. Basically "*motherfucker*" is a noun that can represent any person, places or things. But in this case, Megan uses "*Bitch*" to represent his enemies. It has an irrelevant word of the contexts. There are at least some reasons why the researcher wants to analyze the profanity language used in Megan Thee Stallion's song lyrics. Firstly, the researcher wants to know the types of profanity language used in Megan Thee Stallion's songs, because Megan used any kind of profanity language which has a contrasting meaning from real life. Secondly, the researcher wants to know the function of profanity language used in Megan song

lyrics. Hence, by analyzing, the researcher needs a better understanding of the meaning of the song from Megan Thee Stallion's song lyrics. Then, the researcher chose Andersson's theory because this theory is more precise and easy to understand and very suitable to be used for the object of this song's lyric because it is related to each other compared to other theories.

## RESEARCH METHOD
